SCHOOL ATTENDANCE

And Truancy Discussed by Prof. Bradner—Parents Should Acquaint Themselves With Law

Our last Assembly passed a rigid compulsory Educational Law and provided severe penalties for those who fail to comply with its provisions. The law in part is as follows: "Every parent or guardian having the control or supervision of any child between the ages of 7 and 14 inclusive, shall cause such child to be enrolled in and to attend some Public or Private Day or Parochial School regularly each school year for a full term or period of said school.

"The Board of Education has the power to

excuse a child which has mastered the common branches, or is in poor health.

"Any parent or guardian who shall fail to comply with the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding \$25 for the first offense and of any subsequent offense, upon conviction thereof, shall be fined in any sum not exceeding \$100, or by imprisonment in the County Jail for any period not exceeding 50 days, or both so fined and imprisoned in the discretion of the Court." The same penalty may be inflicted for false statement concerning age of child, etc., by the parent.

This law has been passed with a view of helping the educational condition of Kentucky. It is a move in the right direction and although the law may have many defects, it is the duty of all citizens to uphold it until we get something better.

The local school authorities earnestly request the encouragement and the support of the entire community in their effort to carry out the provisions of this act. Any child between the ages of 7 and 14 not in school after September 8th should be reported to the Trust Officer, M. C. Chisholm, or the Superintendent of Schools.

J. W. BRADNER,
Superintendent City Schools.

PARASITE

**Of Tobacco Worm Discovered—
Little Worm Eats Big Worm**

LEXINGTON, Ky., September 2d.—At the Kentucky Experiment Station Prof. Gorman is exhibiting specimens of the Apanteles Congregatus, the parasite of the tobacco worm.

A few days ago a tobacco grower brought to the station a tobacco worm covered with tiny white cocoons. He wanted to know what it all meant. The Professor told him to come back September 1st and he would explain it to him.

He put the worm in a glass jar and the parasites were hatched out to the number of several hundred small, fly like insects. They will be liberated to prey upon the worms and reproduce themselves.
